Name	Mobile Navigation Trigger
Action	On a mobile device tap on the navigation trigger
Expected Result	Navigation menu should expand
Actual Result	Working as expected.
Status	Pass
Comment	Complete. Issue has been resolved

Update

Comments

Fixed. Please test and review. Thank you

Previously we tested on iPhone 6. It seems the problem has been resolved on 6 but still we have issue on iPhone 5.

There was a div covering the trigger button. I fixed it.

The trigger button works on Android but it is not responsive on iPhone device.
